Background

I'm a self learner, fullstack web and app developer focused in building great projects with the best technologies available.

I recently graduated from the communication sciences career at the university of Buenos Aires and also spent the last three years learning and using programming languages and Frameworks in personal and grupal projects.

As a developer, I enjoy bridging the gap between technology and it's social appropriation — combining my technical Skills with my social sciences knowledge — to create beautiful and practical products. My goal is to always build applications that are scalable and efficient under the hood while providing engaging user experiences.

Relevant Experience

Software Developer and Data assistant @ Fundación Conocimiento Abierto

Jan 2018 // Dic 2019

- ▶ Worked with a variety of different languages, frameworks, and content management systems such as Python, Scrapy, Pandas, Vue, D3, Node.js, etc.
